Appendix V.

[Vide answer to question No. 18 asked by Mr. K. R. Karant at the meeting of the Legislative Council held on the 6th August 1929, page 27 supra.]

Rates to be adopted in valuing trees on darkhast lands.

I. Fruit trees.
II. Bamboos and rattans.
III. Sandalwood, cinnamon and catechu trees.
IV. Other reserved and classified trees.
V. Scrub jungle (exclusive of III).

I. For fruit trees such as mango, tamarind, wild apple, custard apple, cashew, guava, wild gooseberry, gallnut and soapnut—

Girth in feet at 4 feet from the ground.

	Rate. RS.	A.
Less than 1 foot	0	4
From 1 to 2 feet	1	0
,, 2 to 3 ,, ...	1	8
,, 3 to 4 ,, ...	2	0
,, 4 to 5 ,, ...	2	8
Above 5 feet	3	0

A cart-load is to be calculated at 15 cubic feet.

II. For bamboos and rattans—

	Number.	Head-load rate. A.	P.
Large bamboos	5	1	0
Small do.	10	1	0
Rattans		2	0

NOTE.—The number of culms should be counted and converted into head-loads, 200 small bamboos or 100 large bamboos equal to a cart-load.

III. For sandalwood, cinnamon and catechu trees—

For sandalwood trees.

Trees under 6″ in girth	Free.
,, from 6″ to 9″ in girth	Re. 1 each.
,, from 10″ to 18″	Rs. 4 ,,
,, from 19″ to 24″	,, 10 ,,
,, from 24″ in girth	,, 20 ,,

NOTE.—Sandalwood trees are to be measured 1 foot above the ground.

For catechu (Acacia catechu) trees.

Under 6″ in girth	Free.
From 6″ to 12″	Re. 1
,, 13″ to 18″	Rs. 2
19″ and above 19″ in girth	,, 3

6th August 1929]

For cinnamon (Cinnamonum Zeylanicum) trees.

	RS.	A.
From 6″ to 12″	1	0
,, 13″ to 24″	2	0
Over 24″	3	0

IV. For all other reserved and classified trees except those under 6 inches in girth which would be considered as firewood the rules of valuation and rates to be adopted are as follows :—

Every reserved or classified tree will have to be measured and the cubical contents of the timber found out by the application of the following formula :—

$$\frac{\left(\frac{\text{Girth}}{4}\right)^2 \times \text{Length}}{144} = \text{Cubical contents.}$$

Girth = Girth of a tree taken 4 feet above the ground in inches.
Length = Length of a tree in feet.

Length of a tree in feet is to be taken as high as a decent marketable timber piece could be obtained, no matter whether there is a small branch somewhere below. Having thus obtained the cubical contents of the tree, its value is to be calculated at the rate given in the statement below after ascertaining with reference to Appendix B the group of the village wherein the tree is

Examples.—(1) Wanted the value of a kiralbogi tree in Todar village measuring 60 inches in girth, its length of bole is 36 feet (though there is a small branch at 28 feet high)—

Cubical contents of a tree—

$$\frac{\left(\frac{60}{4}\right)^2 \times 36}{144} = 56{\cdot}25 \text{ c.ft.}$$

Todar village as per Appendix B is a village of II group. Value of a cubic foot of kiralbogi in group II = 7 annas. Value of the tree = 56·25 × 7 annas = Rs. 24–9–9.

(2) Wanted the value of a teak tree in Bayaru 44 inches in girth and 24 feet long.

Cubical contents—

$$\frac{\left(\frac{44}{4}\right)^2 \times 24}{144} = 20{\cdot}16 \text{ c ft.}$$

Bayaru is of the I group and value of teak in group I is 14 annas. Value of the tree = 20·16 × 14 annas = Rs. 17–10–2.

Reserved trees of South Kanara district.

Description of trees.			Price per cubic foot.		
Botanical name.	Kanarese name.	English name.	I group.	II group.	III group.
			RS. A. P.	RS. A. P.	RS. A. P.

Earth and turf	....	....	Do. 9 pies.		

[6th August 1929

V. For scrub jungle, unclassified trees under 2 feet in girth, classified, and reserved trees under six inches in girth only suited for firewood, the valuation should be per acre according to the average height of the growth.

Height in feet.		I Group	II Group.	III Group.
From	To	Rate per acre.		
		RS. A. P.	RS. A. P.	RS. A. P.
Up to 3 feet	....	0 8 0	0 7 0	0 6 0
Three to 5 feet	....	1 0 0	0 13 0	0 10 0
Five to 7 feet	....	2 0 0	1 10 0	1 4 3
Above 7 feet	....	3 0 0	2 8 0	2 0 0

NOTE 1.—Rough stone includes undressed burnt stone and every kind of stone that has not been chiselled.

NOTE 2.—The rates for timber tree specified above apply only to rough or unsquared timber. In the case of squared timber, one-half of the above rates extra will be charged.

NOTE 3.—When applied to firewood or posts, the expression cart-load (unqualified) or cart-load (two bullocks) are used as equivalent to 20 cubic feet or half a ton and the expression cart-load (one bullock) means half that quantity. When applied to 'minerals,' cart-load means the load of an ordinary local cart drawn by two bullocks.

The head-load is equivalent to one cubic foot or 56 lb.

Twenty head-loads equal one cart-load.

Four head-loads equal one bullock-load.

Three cart-loads equal one corjee.

NOTE 4.—The above rates are the maxima and they may be reduced by the Collector if good cause is shown by the Tahsildar after personal inspection.

Appendix B.—List of villages in the South Kanara district arranged according to groups for purposes of valuation of darkhast lands, etc.—
